

Subject Index

A

- Acetol and glucose oxidation, 450
- Acetone and glucose oxidation, 450
- Adenosine, insulin action, 62
- Adenylate cyclase activation, 875
- Adoptive transfer, 928
- Aging, fluorescence as marker for pathologies, 796
- κ -Agonists, sensitivity to, 1289
- Albumin
 - permeation, 312, 323
 - transcapillary escape rate, 919, 1212
 - see also Urinary albumin excretion
- Albuminuria
 - enalapril effects, 1575
 - proteoglycan production decrease, 196
 - thrombomodulin levels and nephropathy, 983
 - see also Microalbuminuria
- Aldose reductase inhibitor
 - motor nerve conduction velocity, 663
 - neuropathy, 690
 - autonomic, 613
 - rutin, prevention of age-related pathologies, 796
- Amino acid
 - effect on glucose disposal, 1079
 - replacement, 376
 - residues, 118
 - transport, 570
- Δ -aminoguanidine, prevention of age-related pathologies, 796
- Amylin
 - insulin resistance, 260
 - meal ingestion effects, 752
- Amyloid, islet, formation, 118
- Angiogenesis, inhibitory activity, 12
- Antigen expression, 697
- Aqueous humor, 12
- Arachidonic acid, 914
- Arterioles, 354
- Atherogenesis, insulinlike growth factor I, 657
- Atherosclerosis
 - and hyperinsulinemia, 1527
 - nonenzymatic glycosylation of lipoproteins, 1257
- Atrial
 - natriuretic factor, 483
 - peptide, 289
 - structure, 483

B

- Bacitracin effect on insulin degradation, 1339

- Basement membranes
 - alterations after nonenzymatic glycosylation, 807
 - endoneurial capillary thickening, 909
 - type IV collagen production, 196, 885
- Black Americans, genetic analysis of susceptibility, 49, 1534
- Blastocysts, inner cell mass changes, 471
- Blood
 - flow
 - cerebral, 1040
 - fetal hypotrophy, 743
 - glucose metabolism, 437
 - kinetics of glucose uptake, 955, 965
 - pressure and urinary albumin excretion, 245
 - volume and transcapillary albumin escape rate, 919
 - withdrawal, effect on lymphopenia, 1099
 - see also Hypertension
- Body fat distribution, predictor in Mexican Americans, 283
- Bone metabolism, 477
- Brain stem impairment and hypoglycemia, 1550
- Browning, nonenzymatic, 57

C

- Ca^{2+}
 - ATPase activity
 - glycosylation of erythrocyte membrane, decreased, 707
 - transport, 850
 - channels, voltage-sensitive and cardiomyopathy, 1064
 - influx in β -cells, 1457
 - mobilization changes in non-insulin-dependent diabetes, 1561
- Calcitonin gene-related peptide, 168, 260
- Candida albicans*, 271
- Captopril effects on urinary albumin excretion rate, 1333
- Carbohydrates, postprandial metabolism and insulin delivery, 142
- Cardiac autonomic function, measurement of heart-rate variability, 1177
- Cardiomyopathy and voltage-sensitive Ca^{2+} channels, 1064
- Cardiorespiratory reflexes, effect of pancreas transplantation, 802
- Cataracts, oxidative stress, 1347
- Cats, islet amyloid polypeptide, 118
- α -Cells
 - major histocompatibility complex, 415
 - physiology, 407
- β -Cells
 - antigen expression, 697
 - defect and obesity-induced diabetes, 1050
 - desensitization and insulin secretion, 1581
 - destruction, autoimmunity studies, 590, 1273
 - glucose-induced electrical activity, 1457
 - insulin secretion signaling mechanism, 1461
 - islet
 - amyloid polypeptide and insulin secretion, 634
 - transplantation, 401
 - major histocompatibility complex, 415, 1125
 - nonprogressive subclinical dysfunction, 549
 - pancreas transplantation, 534
 - pancreatic, glucokinase as glucose sensor, 647
 - sulfated cholecystokinin-8 effects, 702
 - T lymphocyte
 - induced destruction, 928
 - receptor effect, 975
- Cerebral glucose metabolism, 175
- Children, insulin-dependent diabetes
 - cyclosporin and remission, 1264
 - incidence trends, 858
 - islet cell antibodies as predictive marker, 1144
- Chinese, non-insulin-dependent diabetes prevalence, 390
- Cholecystokinin-8 effects on insulin secretion, 702
- Cholesterol
 - metabolism in diabetic rabbits, 626
 - reduced membrane fluidity, 241
- Cholinergic nerve, 891
- Chromatin structure, 348
- Collagen
 - fluorescence as marker for age-related pathologies, 796
 - type VI, 31, 196, 885
- Converting-enzyme inhibition, glomerular barrier function, effect on, 76
- C-peptide levels
 - concentrations after onset, 653
 - elevated fasting and prevalence, 104
 - remission from insulin dependency, 768
 - retinopathy, 1445

January, 1-128
February, 129-269
March, 271-399

SUBJECT INDEX 1990

Creoles, non-insulin-dependent diabetes prevalence, 390
Cyclosporin
 allograft survival, with UV light, 305
 immunosuppression monitoring, 204
 insulin-dependent diabetes remission in children, 1264
 pancreatic events, effect on, 508
 remission from insulin dependency, 768
 Shwartzman reaction, 82
Cytokine, effect on pancreatic islet cells, 415

D

Diacylglycerol, 181, 667
Diabetic feet. See Foot, diabetic
Diet
 high fat, 226
 incidence of diabetes, 432
 obese pregnant women, 234
Dogs
 hepatic glucose uptake, 87
 insulinlike growth factor I and insulin effects, 340
 intravenous glucose sensor, 1519
 portal insulin absorption, 1361

E

Enalapril effects
 glomerular barrier function, 76
 hypertension, 1575
Enzyme regulation, 523
Enteric nervous system, 891
Erythrocyte
 fetal, effect on glucose homeostasis, 1191
 membranes, Ca²⁺-ATPase activity after glycosylation, 707
 -type glucose transporter, 1543
Exercise
 diabetic feet, 938
 increase in glucose transporters, 1425
 -induced urinary albumin excretion rate, captopril effects, 1333

F

Fat
 intra-abdominal and non-insulin-dependent diabetes prevalence, 104
 oxidation, 22
Fatty acids
 free
 glucose oxidation and hypoglycemia, 134
 inhibition of insulin binding, 570
 Randle's cycle, 383

ω -3
 marine lipids, 426
 vascular risk factors, 368
Fetal
 hyperinsulinemia, 541
 hypotrophy, 743
Fibroblasts
 estimating initial glucose uptake rate, 1228
 growth factor mitotoxins, 1002
 nonenzymatic glycosylation of lipoprotein effect on binding, 1257
FK 506 effects, 1585
Foot, diabetic, exercising and medial arterial calcification, 938
Freund's adjuvant, 583

G

Galactosemic cataract formation, 1347
Gangliosides, 782
Genetics
 gene
 expression affected by insulinlike growth factor, 1490
 structure, 523
 HLA associations, 1153, 1504
 susceptibility
 Black Americans, 49, 1534
 HLA-DQ β sequence, 96
 HLA-DR haplotypes, 1138
 mapping, 1315
 streptozocin-induced diabetic mice, 1298
 Welsh patients, 1479
 transcription, insulin accumulation, 683
 see also Insulin receptor
Gestational
 diabetes mellitus, diet in obese women, 234
 hyperglycemia, 734
Glomerular
 barrier function, enalapril effects, 76
 basement membrane, measurement, type VI collagen, 31
 filtration rate
 exchangeable sodium, vasoactive hormones and insulin therapy, 1182
 islet isografts effects, 323
 reversal by blood glucose normalization, 989
 hyperfiltration, 989
 volume and nephropathy, 1057
 myo-inositol effects, 312
Glucagon
 amino acid replacement effects, 376
 insulinlike growth factor I effects, 340
 posttranslational processing, 406
 release
 homologous galanin effects, 996
 inhibition of, 1320

Glucose

 basal production impaired, 597
 cerebral metabolism, 175
 clearance, 211, 340
 cycling, 456
 delivery
 increased and postprandial hyperglycemia, 1381
 routes, 87
 disposal
 amino acid effects, 1079
 insulin effect in skeletal muscle, 1106
 oral glucose ingestion, 747, 775
 glucokinase as sensor, 647
 homeostasis
 fasting, refeeding, diabetes and insulin effects, 712
 fetal erythrocyte effects, 1191
 regulation of, 523
 sensitivity to κ -agonists, 1289
 vanadate effects, 1326
 -induced
 electrical activity in β -cells, 1457
 increase in diacylglycerol, 667
 insulin secretion, 1170, 1461
 ingestion rate and insulin economy, 775
 intravenous sensor (dogs), 1519
 islet amyloid polypeptide response to, 639
 levels
 glycosylation of erythrocyte membranes, 707
 insulin secretion, 397
 normalization effects, 989
 predictor in Mexican Americans, 283
 sulfated cholecystokinin-8 effects, 702
 metabolism
 impaired in skeletal muscle, 1106
 increased and postprandial hyperglycemia, 1381
 reduction, 437
 oxidation
 acetone and acetol inhibition, 450
 hyperglycemia, 149
 hypoglycemia, 134
 insulin effects, 1373
 lipoprotein modification, 1420
 stimulation of, 22
 placental flux, 276
 production
 insulinlike growth factor I and insulin effects, 340
 negative, 217
 Randle's cycle, 383
 recovery and amino acid replacement, 376
 resistance and impaired glucose metabolism, 1106
 sensing, glucokinase, 647
 stimulation of insulin release, 1320
 tolerance
 gestational hyperglycemia, 734

SUBJECT INDEX 1990

M

- Macrophages
 - β -cell destruction development, 1273
 - receptor system, 1510
- Major histocompatibility complex
 - class II expression inhibited, 1125
 - cytokine effects on pancreatic islet cells, 415
- Maternal diabetes, 276
- Mauritians, non-insulin-dependent diabetes prevalence, 390
- Medial arterial calcification, 938
- Membrane fluidity
 - lipoprotein cholesterol concentration, 241
 - polymorphonuclear leukocytes, 466
- Memory and learning, 1391
- Metformin effect on insulin metabolism, 844
- Mexican Americans, predictors of non-insulin-dependent diabetes, 283
- Mice
 - coxsackievirus-infected, food intake, 675
 - displacement of monoclonal antibodies, 1203
 - insulin action, 563
 - major histocompatibility complex, 415, 1125
 - nonobese diabetic (NOD)
 - anti-islet cell antibodies, 1366
 - CD3-complex stimulation of T lymphocytes, 815
 - diet effects, 432
 - Freund's adjuvant, 583
 - interleukin 2 receptors impaired, 1070
 - islet antigen antibodies, 1085
 - macrophages in β -cell destruction, 1273
 - prophylactic insulin therapy, 933
 - T-lymphocyte-receptor effects, 975
 - ob/ob*
 - effects of CP 68722, 1218
 - sensitivity to κ -agonists, 1289
 - vanadate effects, 1326
 - streptozocin-induced diabetic
 - genetic susceptibility, 1298
 - learning and memory, 1391
 - thromboxane synthase inhibition, 196
 - transgenic
 - glucagon processing, 406
 - model of insulin-dependent diabetes, 879
- Microalbuminuria
 - development of, 245
 - nephropathy detection, 761
- Mineral metabolism, 477
- Muscle
 - glucose transporter, 1543
 - insulin resistance, 211
 - postprandial hyperglycemia, 1381
 - skeletal
 - contraction changes, 460

- glucose
 - disposal, 157
 - exercise effects, 1425
 - transport, 865
- insulinlike growth factor I effects, 1028
- metabolism, insulin effects, 490, 1106
- ventricular papillary, action potential duration, 1485
- Mutation *db*, 675

December, 1461-1587

SUBJECT INDEX 1990

P

- Pain and neuropathy, 898
- Pancreas
 - cyclosporin effects on, 508
 - fibroblast growth factor mitotoxin effects, 1002
- islet cells
 - major histocompatibility complex, 415
 - natural killer cell cytotoxicity, 836
- transplantation
 - cardiorespiratory reflexes, effect of, 802
 - hyperinsulinemia, 534
 - nerve conduction, effect of, 802
 - stimulation of islet hormone secretion, 1235
- Pima Indians, insulin and hypertension, 1430
- Platelets
 - enhanced aggregation in non-insulin-dependent diabetes, 1561
 - reduced membrane fluidity, 241
- Polycystic ovarian disease, 361
- Polyol pathway
 - activation under hyperglycemic conditions, 949
 - myo-inositol-depletion hypothesis, 1305
 - neuropathy, 663
 - inhibition of and autonomic, 613
 - skeletal muscle contraction, 460
- Polyphosphoinositide turnover
 - changes in non-insulin-dependent diabetes, 1561
 - ganglioside treatment effect, 782
- Pregnancy
 - arachidonic acid, 914
 - gestational hyperglycemia, 742
 - inner cell mass changes, 471
 - obese women, 234
- Protein
 - kinase C
 - glucose effects, 667
 - insulin effects, 181
 - sulfonylurea effects, 1399
 - phosphorylation
 - changes in non-insulin-dependent diabetes, 1561
 - ganglioside treatment effect, 782
 - S, acquired deficiency, 446
 - turnover, 541
- Proteoglycan, production decrease and albuminuria, 196
- Puberty, effect on kidney growth, 557
- Pyruvate dehydrogenase, 361

R

- Rabbits
 - aqueous humor, 12
 - cholesterol metabolism, 626
- Randle's cycle, 383

Rats

- BB
 - adoptive transfer by T lymphocytes, 928
 - autonomic neuropathy, 613
 - bone and mineral metabolism, 477
 - FK 506 effects, 1585
 - insulin autoantibodies lacking, 720
 - islet transplantation, 519
 - lymphopenia, blood withdrawal effects, 1099
 - natural killer cell cytotoxicity, 836
 - silica treated, 590
- BB/Edinburgh
 - anti-idiotypic antibodies, 1467
 - cyclosporin effects, 508
- BB/Wor
 - islet destruction, 643
 - RT6 alloantigen, 1279
- fetal hyperinsulinemia, 541
- hepatocytes, free-fatty acid effects, 570
- hyperglycemia, 168
- myo-inositol uptake, 575
- insulin
 - effects, 181
 - sex and obesity effects, 789
- Lewis, antigen expression, 697
- pancreas
 - cyclosporin effects, 508
 - high glucose levels, 397
 - homologous galanin effects, 996
 - islets, glucose cycling, 456
 - pulsatile insulin secretion, 112
 - thymidine kinase activity, 70
- phosphotyrosine-containing proteins, 528
- placental transfer, 276
- protein turnover, 541
- Shwartzman reaction, 83
- Sprague-Dawley
 - β -cell desensitization and insulin secretion, 1581
 - glucose
 - hepatic production inhibited, 1408
 - induced diacylglycerol increase, 667
 - transporters, 712, 1543
 - growth factors in aorta, 657
 - insulin secretion and ion-channel studies, 1353
 - islet amyloid polypeptide, 634, 871, 875
 - lithium effects, 1243
 - vanadate effects, 821, 1243
- Wistar
 - fetal erythrocytes effect on glucose homeostasis, 1191
 - galactosemic cataract formation, 1347
 - hyperglycemia
 - fat feeding, 226
 - gestational, 734
 - insulin secretion, 1436

- impaired β -cells and obesity, 1050
- kinetics of ATP hydrolysis, 1472
- lactogenic receptors on β -cells, 1045
- prevention of age-related
 - pathologies, 796
 - sulfated cholecystokinin-8 effects, 72
- Zucker, impaired β -cells and obesity, 1050
 - see also Streptozocin-induced diabetes mellitus
- Resonance Raman spectroscopy, 1451
- Retinopathy
 - C-peptide, 1445
 - glycemic control and blood flow, 602
 - insulinlike growth factor I, risk factor, 191
- Rutin, prevention of age-related
 - pathologies, 796

S

- Sex
 - as factor in complications prevalence, 1116
 - behavior and insulin replacement, 942
 - effect on insulin metabolism, 789
- Shwartzman reaction, cyclosporin effect, 83
- Sodium retention, 289
- Somatostatin
 - concentrations in non-insulin-dependent diabetes, 1198
 - secretion, homologous galanin effects, 996
- Streptozocin-induced diabetes mellitus
 - mice
 - genetic susceptibility, 1298
 - learning and memory, 1391
 - rats
 - aldose reductase inhibitors, 690
 - atrial structure, 483
 - blood glucose
 - metabolism, 437
 - normalization effects, 989
 - cholinergic nerve, 891
 - embryopathy, inner cell mass, 471
 - enalapril effects on hypertension, 1575
 - fetal hypotrophy, 743
 - ganglioside treatment effect, 782
 - glomerular filtration rate, 312, 323, 1182
 - glucose transport in skeletal muscle, 865
 - insulin
 - effect on glucose utilization, 1106
 - glucose dependency of release, 1320
 - kidney
 - function, 299
 - growth, 557
 - liver glucose-transporter protein, 441
 - membrane fluidity, 466

DIABETES: VOLUME 39 (1990) PAGE NUMBERS BY ISSUE

January, 1-128
 February, 129-269
 March, 271-399

April, 401-522
 May, 523-645
 June, 647-759

July, 761-877
 August, 879-1007
 September, 1009-1152

October, 1153-1314
 November, 1315-1460
 December, 1461-1587

neuropathy, elemental and water distribution, 1498
 norepinephrine effects, 354
 pancreatic islets, glucose cycling, 456
 prevention of age-related pathologies, 796
 sexual behavior and insulin replacement, 942
 skeletal muscle contraction, 460
 vanadate effects, 1, 757, 821
 vasoactive intestinal polypeptide content, 608
 ventricular papillary muscles, action potential duration, 1485
 Wistar, transcapillary albumin escape rate, 919
 Zucker, insulin-receptor tyrosine kinase activity, 619

T

Thrombomodulin levels and nephropathy, 983
 Thromboxane
 beneficial changes of vascular risk factors, 368

synthase inhibition, 196
 Thymidine kinase, 70
 T lymphocytes
 adoptive transfer, 928
 CD3-complex stimulation, 815
 interleukin 2 receptors impaired, 1070
 Ly-6C expression, 815
 macrophage-dependent decrease, 590
 pyruvate dehydrogenase sensitivity, 361
 receptor effects on β -cell, 975
 RT6 alloantigen, 1279
 Tolbutamide effects on glucose uptake, 1399
 Transcapillary escape rate, 919, 1212
 Tumor necrosis factor, increased lipoprotein and triglyceride, 1569
 Type I diabetes. *See* Insulin-dependent diabetes mellitus
 Type II diabetes. *See* Non-insulin-dependent diabetes mellitus
 Tyrosine
 kinase activity in obese Zucker rats, 619
 phosphorylated proteins, 528
 Tumor necrosis factor, major histocompatibility complex, 1125

U

Urinary albumin excretion
 blood pressure, relationship with, 245
 captopril effects, 1333
 see also Microalbuminuria
 UV light, prolongation of allograft survival, 305

V

Vanadate, insulin-mimetic effects, 1
 amylase activity normalized, 757
 glucose homeostasis improved, 1326
 glycogen metabolism affected, 821
 trace-element therapy, 1243
 Vascular
 permeability, 1212
 sensitivity to norepinephrine, 354
 Vasoactive intestinal polypeptide content and neuropathy, 608

W

Welsh patients, susceptibility of non-insulin-dependent diabetes, 1479
